## DETAILED ACTION

### *Allowable Subject Matter*

1. **Claims 1-8** are allowed.

The following is an examiner's statement of reasons for allowance:

2. **Claims 1-8** are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art references which teaches at least the limitation passing the encapsulated signaling information from the SCCP to an adaptation layer arranged to determine an IP address and port number associated with said address information and passing the signalling information and said IP address and port number to an IP part and transmitting the signalling information over an IP network to said IP address in one or more datagrams as recited in the independent claims. Examiner notes the closest cited prior art "Customers in Diver's Seat: Private Intelligent Network Control Point" to *Sevick et al.* does not clearly teach how the mapping is performed through encapsulation, see e.g., right-hand column on page 42. WO 97/42774 to *Glitho et al.* teaches IP-SCCP encapsulation, however, the datagram is sent over an SS7 network and not over an IP network. Examiner also acknowledges applicant's corresponding patent 6,757,552 B1 with respect to e.g., claim 1 and e.g., column 6, lines 10-14.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
